

5 Levels of Gifted: School Issues and Educational Options

Formerly titled *Losing Our Minds: Gifted Children Left Behind*, this book describes differences in developmental stages within the gifted population. The children are classified into five levels of giftedness based on behaviors and developmental milestones, giving parents and educators a reference guide to compare with their own gifted children or students. A child's intellectual level can thus be estimated, after which the book provides different educational approaches and practical advice, including how to find the best type of school for each level.
