

Hands-On Activities for Exceptional Students: Educational and Pre-Vocational Activities for Students with Cognitive Delays

An excellent resource for educators teaching lower-functioning students! Packed full of activities designed to teach students how to work independently for designated periods of time. The skills addressed in this new book are essential for students hoping to gain employment in a sheltered workshop environment. There are over 70 activities included in this resource, addressing the following subject areas: Pre-vocational, Math, and Reading/Language skills. All activities are self-directed and facilitate independent functioning! A must-have for Special Education teachers.
