

Air! An Incredibly Cool Unit for Elementary Gifted General Intellectual Ability

Balloon cars, hovercrafts, gliders, prototypes, zip-lines and air rockets, helicopters and more ... Here is a full unit with more than 20 hours of critical thinking and hands-on activities designed specifically for all 21st Century Learners and nonverbally gifted learners. STEM teachers: this unit guides students through the engineering process time and time again in an elementary style! Not only is this unit packed with critical thinking opportunities and rich in deeper understanding of physical science concepts, it is a fun, hands-on, student-centered unit which instructs teachers about the talents and abilities of their nonverbally strong students along the way. It's not just for the nonverbals. This unit calls forth a variety of talents and skills. I used this unit with my 3rd grade GATE talent pool students identified gifted in verbal, quantitative, and nonverbal abilities. Intellectually, the unit was an apt challenge. The hands-on activities were pretty tough for fingers still developing dexterity, and this is why I believe the unit would be excellent for 4th, 5th, and 6th grade students as well. You'll see plenty of unique activities and creative approaches. You may have seen some of these activities before peppered around the web, but I know you can only find them collected, adapted, standardized, tweaked, stylized, and themed for excellent pedagogy right here!

grams for gifted children in local administrative units: L. A study .. physical growth, mental ability, and emotional .. About fifty books for this area were selected from the general library .
